Workday Implementation – Change Management Report

AGENDA:

1 MEETING OBJECTIVES

2 EXECUTIVE SUMMARY – KEY CHANGE THEMES

3 AUDIENCE ASSESSMENT SUMMARY

4 COMMUNICATION APPROACH

5 TRAINING APPROACH

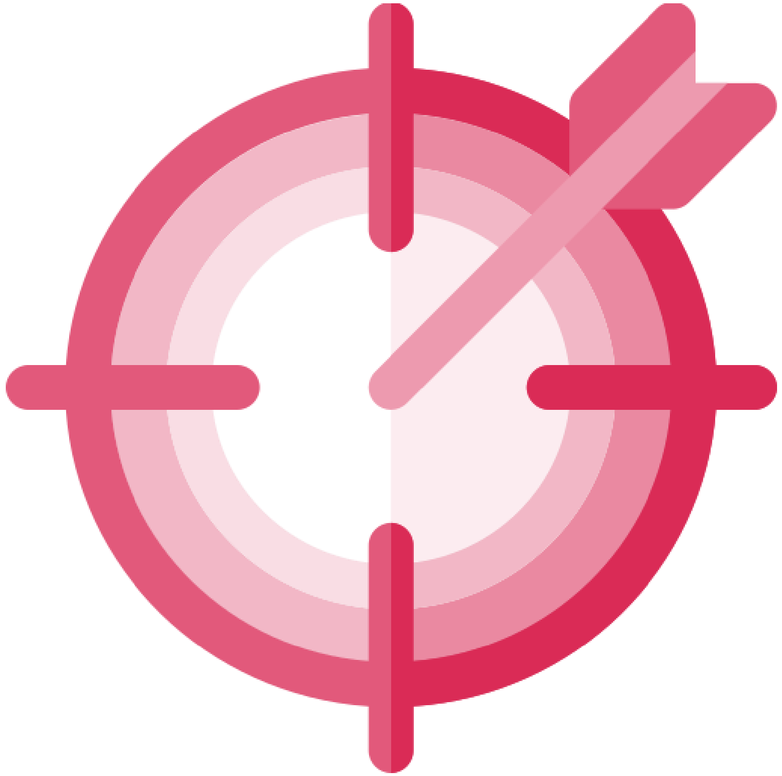
6 NEXT STEPS

7 APPENDIX

Meeting Objectives

Objective of today's session…

- Summarize findings from the Change assessment sessions
- Outline recommended communication and training approach
- Agree on next steps



At a glance…

Change Activities with Project Timeline

Week Starting	5/9	5/16	5/23	5/30	6/6	6/13	6/20	6/27	7/4	7/11	7/18	7/25	8/1	8/8	8/15	8/22	8/29

Change Strategy Inputs

Assessment Workshops with each Functional Workstream

Confirm design decisions and future state configuration

Clarify RAID item implications and status updates

Discuss current vs. future state – gap & key considerations for transition

Environment & Strategic Decisions

- Harmonization of processes across Brands in progress
- No “Full-fledged” MSS
- Other business projects in addition to HR Workday implementation
- Focus on guiding principle – Digitize HR
  - ✓ Minimize disruption to the business
  - ✓ Focus on employee experience

To be added…

Group/Brand Perspective

Representation from groups/brands such as Maharam, HH etc., - need to drive standardization with minimal customization (as applicable)

International POV

Representation from International and follow-up session will be required to dig deeper into the implications of Phase 1 scope for international locations (especially Payroll)

Pending Workstreams

These workstreams require change assessment and training needs identification:

Time Clocking – Dormakaba

Advanced Scheduler

Workday Help

Key Change Considerations

Biggest Impact from Payroll & Time Tracking

Build end-user confidence that there will be no adverse impact as a result of new payroll and clocking system, and it is an easy-to-use interface to access information.

Service Delivery Model design is key

Design details, execution and coordination between HRSS, HRBPs and COEs are critical to success.

Effective Go-live date Comms clarity

Clarity in communication of effective go-live, for different tasks in the Workday system, to various sub-groups depending on their pay cycles is needed.

International impact is significant

Despite narrower scope, impact is significant since they are coming from manual processes. Strong coordination needed between HRSS + Local HR + Payroll teams.

Limited Manager Self-Service

Limited MSS capability to preserve data integrity and manager experience will drive the responsibility to be picked up by other groups.

Cutover Activities

Freeze dates, blackout periods and data migration are key pieces of comms and drive how soon Workday comms must start.

HRBPs will play key role

HRBPs will still play key role as first POC and kick off transactions. They need detailed understanding of new ways of working.

Position Management

Strong foundational understanding required for all stakeholders – Leadership, HRBPs and HRSS.

Audience Assessment Summary

Key Stakeholders

Primary Audiences

- Associates
- Managers
- HRBPs
- HRSS

Secondary Audiences

- COEs
- HRIS
- Retirees
- Terminated Associates
- Finance

* More details on considerations for each stakeholder group in the Appendix

Key Stakeholders - Associates

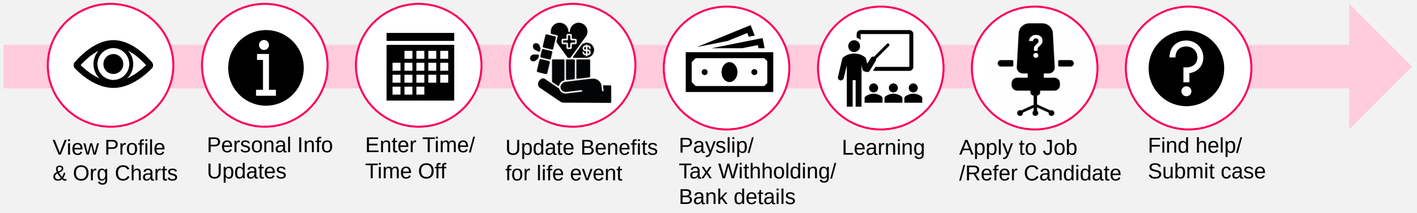
Associates

Change Considerations

- Used to some form of self-service today; better user-experience with Workday
- Clear communications will be key for building awareness in the absence of formal classroom training
- Will require a mix of communication channels and translations to cater to diverse global landscape
- Clarity on support model when they need help will be crucial
- **Follow-up**: Special considerations for Union Associates

Degree of Impact

Workday System Touchpoints at Launch



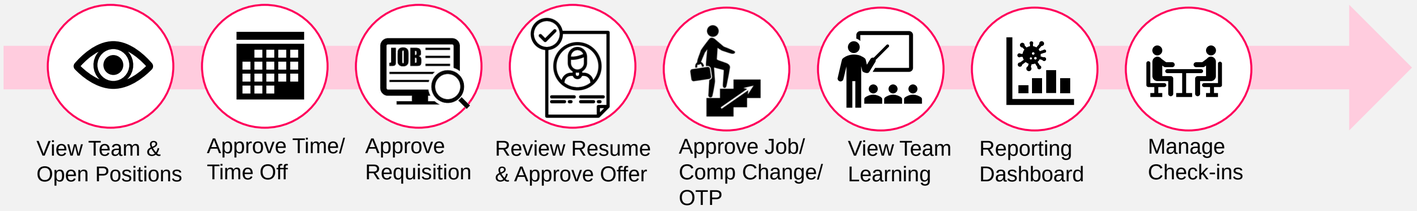
Key Stakeholders - Managers

Change Considerations

- Managers will have few system touchpoints (for e.g., team visibility, approvals, talent tasks)
- Leaders with orgs across brands and geographies will now have improved experience and visibility
- Global leaders may experience inconsistencies with processes, job architecture, calendaring of talent activities etc.
- Reinforce that HRBPs will continue to support and provide business advisory

Degree of Impact

Workday System Touchpoints at Launch



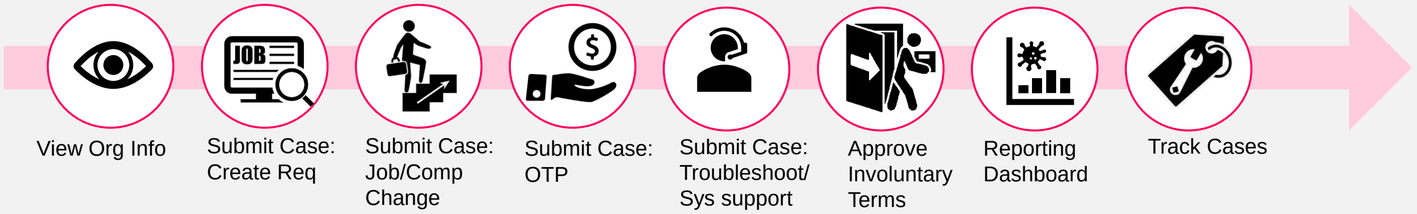
Key Stakeholders - HRBPs

Change Considerations

- Will need education on new ways of working with Workday as they remain the first point of contact while we continue to harmonize
- Solid foundation on position management and its implications on staffing/recruitment is crucial
- Will have visibility to a lot of data – trust and transparency critical
- Need to understand case management tool and how to collaborate with Shared Services for transactional support

Degree of Impact

Workday System Touchpoints at Launch



Key Stakeholders - HRSS

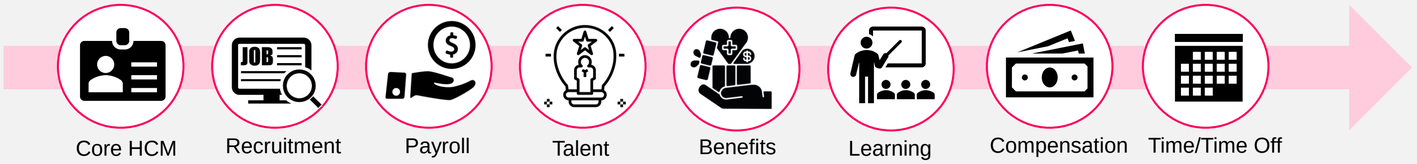
HRSS

Change Considerations

- Urgency to staff with skilled resources to support North America and International
- Establish governance model that builds strong execution between HRSS, HRBPs and COEs
- Compressed time to hire and train prior to go-live

Degree of Impact

Workday System Touchpoints at Launch



Responsible for initiating tasks in these areas or supporting end users with transactional help

Key Stakeholders – Secondary Audiences

COEs

- Play a key role in HR Service Delivery
- Some COEs also experiencing internal reorg parallel (for e.g., Benefits, Talent Acquisition)

Terminated Associates

- With Workday, terminated Associates will no longer have system access; change as they currently have access for payroll items
- Offboarding checklist to remind EE to download docs

HRIS

- Will work on complex technical resolution, tenant management and Workday updates
- May experience more escalations at the beginning as relatively newer SS team build knowledge

Retirees

- Small group of ~38 Associates which will be maintained in custom organization for processing payments
- Over time this org will be obsolete as privileges for the current group end

Finance

- Some system approvals going away – need heads-up
- Need awareness of Workday reports that will be available to them to stay updated with changes

Change Impact Assessment Findings

Core HCM

Scope

- Global

Technology Landscape

- Workday will be new source of truth replacing Dayforce and Ultipro
- Integration with Gallup to manage exit surveys on Termination

Cutover plan implications

- Task at launch prompting Associates to validate address, emergency contacts etc.

Audience Impact

- HRBPs and Leaders will need foundational training on position management and its implications on staffing transactions
- Big change for International Associates as they are currently not on any system
- Associates - Workday will provide better visibility to information and robust self-service capability than any of the existing systems
- Contingent workers will all be in the Workday system to enable headcount tracking; education needed for Managers on hiring process once standardized
- **Follow-up**: HRBP approval in system for legal name change to ensure review of updated SSN card

Big Wins

- One system of record allowing for Cross-group visibility of global org charts and profiles
- Workday Mobile functionality - easy of approvals by Executives, Sales Managers that are traveling; easy access for Ops Associates on the floor

Recruiting

Scope

- North America only
- International is part of Phase 2, cloud-based ATS Go-Hire adopted as interim solution; will pose a change management challenge for Phase 2

Technology Landscape

- Workday will replace numerous systems in use today such as SilkRoad in XX, Fitzi in Fully, Greenhouse in XX, Taleo in HM
- Questionnaires in Workday will be leveraged to capture requirements gathered by Recruiters during Intake calls with business; Word docs will be eliminated
- Interview scheduling and reference checks will be offline outside Workday
- Integration with Sterling for background checks

Cutover plan implications

- Open requisitions with active candidates will be moved to Workday
- Clarity on cutover details crucial to comms for Recruiters and business (managers/leaders)

Audience Impact

- Visibility of jobs across all groups/brands will be a big boost for internal movement and talent retention
- Manager approvals of requisitions and offers in the system will be new; approvals being streamlined and based on amount
- Managers will also leverage Workday instead of emails to review candidate resumes and decline/move forward
- HRBPs will contact HRSS for transactional support with creating requisitions only; Recruiters perform all subsequent screening and hiring steps as the Primary Recruiter
- Visibility of candidates will be open to recruiters across the board; cross platform visibility unavailable today
- Recruiters will need education of new candidate selection workflow as steps/stages are slightly different. Workday also offers exciting new features for e.g., dynamic pools.
- Recruitment team undergoing org re-design; new support structure (including coordinators) to be communicated
- Big win for HRBPs who manually complete I9 verification today as responsibility moves to Shared Services

Payroll

Scope

- Limited to US and Canada; OSV will provide Workday Payroll support
- **Follow-up**: Workday to be integrated with International Payroll systems? PIMS to stay?

Technology Landscape

- Workday to replace Ceridian/Dayforce at XX, UKG/Ultimate at HM & ADP at XX
- Pay card vendor changing across the org - will encourage existing Associates to switch to the new card but can continue to use existing cards
- Daily pay vendor is also changing -TBD (<200 use daily pay so low impact). Daily pay is new for XX

Cutover plan implications

- First date for time entries to vary by pay group: XX Canada - Dec 18, XX US biweekly salaried - Dec 23, XX US weekly - Dec 25, HM US & Canada - Dec 25
- **Follow-up**: Visibility in legacy systems for historical info
- **Follow-up**: Cut-off dates and blackout period for payroll-impacting transactions

Audience Impact

- Payout date for XX Canada changing from Friday to Thursday – minimal impact as small group
- Subset of XX Associates (~30-40) which receive checks will no longer have this option as they must enter direct deposit or pay card
- Pay slip format will change significantly – formatting of sections, labels of earnings and deductions etc. Education will be required with side-by-side samples.
- Associates will experience minor variances with taxes as rounding, calculations and labels will change
- Associates must be encouraged to validate their direct deposit information in Workday at launch as this information will be migrated
- Terminated Associates losing system access will be new as they currently have access for payroll items; offboarding checklist to include instructions on downloading documents
- **Follow-up**: Who tracks recoverable one-time-payments?

Time Tracking

There are three distinct sub-groups of the audience based on the way they will interact with the time module in Workday:

1. Punching at physical clocks

- Applies to production Associates that currently clock in using Dayforce and Kronos clocks
- Integration will bring over time entries to Workday
- Dayforce and Kronos clock will be replaced by Dormakaba clocks; these clocks will have minimal info visibility
- Current badging cards to continue; Future state mobile punching will be win

2. Web clocking on Workday

- Applies to XX Prodn. Associates that do web punching with Dayforce and XX Associates that record in and out timestamps in Kronos today

3. Entering Time in Workday

- Applies to hourly office Associates (professional non-exempt)
- Different for HM hourly office Associates as they enter in and out timestamps in Dayforce today; will only enter hours in Workday

Scope

- Hourly Associates in US & Canada only
- Contingent workers are excluded from the scope; they will continue to use their own time-keeping systems

Big Wins

- Time-hub view for Managers that provides a consolidate view of all entries and option to bulk approve will be particularly appreciated by Operations
- Ability to enter both time worked and time off in the timesheet, will mimic capability in current system and provide a streamlined end-user experience
- **Follow-up**: While the capabilities of the Advanced Scheduler are being explored, this will have a major impact on Manager experience will visibility to all data elements in one single system

Time Off and Leave of Absence

Scope

- Hourly Associates in US & Canada only
- Vacation entries by US Salaried Associates to be encouraged but not mandatory – auto approved when entered

Wins & Tradeoffs

- Manager ability to enter time worked and time off on a single calendar in WD will mimic current state capability and will be convenient
- Managers at HM will lose visibility to time off in Teams calendar, supported by XX today

Technology Landscape

- Workday will replace Kronos at HM, Dayforce at XX and ADP at XX for time off entries
- LOA for US will continue to be managed on vendor sites; In Canada, Associates will continue to inform HRBPs
- **Follow-up**: Continue New York Life and Unum for HM & XX or harmonize?
- **Follow-up**: Absences not managed by vendors (for e.g., unavoidable sick time, layoff) to be entered in Workday?

Audience Impact

- Associates – Need education on when/how to contact vendor vs. enter request in Workday
- **Follow-up**: Production Associates to continue notifying Manager for entering time off on their behalf?
- **Follow-up**: Will Managers have ability to enter/correct retro time off entries or will it continue to go through payroll?
- **Follow-up**: HRBPs to have ability to view timesheets and enter time off or LOA not managed by vendors?
- **Follow-up**: Payroll role in maintaining status for LOA – what comes in through file feed, process for updating return from LOA etc.

Cutover plan implications

- **Follow-up**: Re-entry of pre-approved future-dated time off requests required at launch?
- **Follow-up**: Black-out periods for entering time off?

Benefits

Scope

- Limited to US Associates only
- Canada benefits will continue to be managed on 3rd party site ManULife with appropriate deductions process through Workday payroll

Technology Landscape

- Workday will be the new system of record replacing XYZ and BenefitsPrime
- Vanguard will be used to manage Retirement Savings
- WTW being explored for outsourcing of benefits support
- Alex – chatbot that uses AI to offer advice on best plan options, based on income and family details, will continue

Cutover plan implications

- Open Enrollment for this year will be completed in current system and information will be migrated
- Encourage all to confirm benefit plan elections, beneficiaries, and deductions in Workday at launch
- **Follow-up**: Implications for new hires onboarded in Dec & potential policy revision on eligibility rules

Tradeoffs

- With XYZ going away, company will move from a fully outsourced benefits management model to a partially internally managed one
- Workday system capabilities will be limited when compared with XYZ which provided easy-to-use Mobile app with direct links to carrier sites and real-time visibility to track out-of-pocket deductions.
- If Shared Services offers transactional support, users will need clear direction on when to contact SS vs. vendor
- Integration issues and file feeds are managed by Dayforce/UltiPro; will have to be managed by HRIS in future state

Audience Impact

- Existing Associates will only use the module at launch to update benefit elections for qualifying life events as OE for 2023 will be completed in existing system
- New Hires will submit benefit elections in Workday as part of onboarding
- HRBPs need education on harmonized benefit plans

Compensation

Scope

- Global
- One-time payments in Workday to be used in North America only
- Advanced Compensation rollout in Phase 2 will have more change management implications for Managers

Technology Landscape

- Workday will be new source of truth replacing Dayforce and Ultipro
- Sales compensation will be maintained on separate system which will track progress and display real-time sales information. Only target details will be maintained in Workday.
- **Follow-up**: Check if all brands will be aligned on a single system – Xactly, for tracking sales compensation.

Audience Impact

- Employee visibility of compensation is a win as Dayforce does not have any pay information except on paystubs
- Some Managers (for e.g., legacy XX and Maharam) do not have anytime access to their team members compensation on a system today
- Manager approval for compensation changes and one-time payments in the system will be new for XX although it is a welcome change; education needed that this is a signoff step that doesn't replace prior offline conversations
- HRBPs need training on the process to request transactional support from HRSS for entering compensation changes and OTPs
- International Associates' comp visibility is a larger change due to geographical differential pay and how it works
- **Follow-up**: HRBPs to have access to reports with comparative compensation to help guide conversations with Managers about compensation change?

Talent & Performance

Scope

- Global – salaried and hourly Associates

Technology Landscape

- App used for Recognition is going away; gap in functionality until decision is made
- Power app used at HM for development planning will be going away; TBD if development goals in Workday to be used in lieu

Cutover plan implications

- **Follow-up**: Enter goals maintained manually today into the Workday system at launch so it can be used for periodic performance discussions during check-ins?

Audience Impact

- Talent module will present one of the first touchpoints for Manager self-service as quarterly check-ins will be managed in Workday
- Cycle for salaried Managers (quarterly) and their hourly ops reports (anniversary-based) will be different and hence they need separate communications
- Directors and above will use Workday to enter their career preferences which will feed into potential assessment and succession planning discussions; only applicable to those aiming to move to the VP level
- Goal setting for next performance year will be huge change
  - ✓ Manager ability to add for team members will also be new; need education on concept and how leaders should cascade scorecard metrics to reports
  - ✓ Hourly Ops (except China) will be encouraged to create dev goals; won't create business goals
  - ✓ Goals feeding into check-in template will be new; change from informal, engagement and development focused to formal & structured, performance-based

Learning

Scope

- Global; internal users only (external users from Sales org maybe added in future)
- Bigger change for XX and some international groups such as China Ops where no LMS exists today

Technology Landscape

- Workday will be the new LMS replacing Learn (Oracle Cloud solution) at HM
- Learn Upon will continue to be used by Sales org; this group is used to accessing two different learning environments today
- Performative for feedback surveys; one-way integration from Workday will prompt surveys post training

Cutover plan implications

- Two years learning history will be imported for those who use LMS today
- 15 years history will be saved in backup with access limited to Legal and Safety teams for compliance
- **Follow-up**: Blackout periods for compliance trng, change in providers, calendar changes (perpetual/annual)

Audience Impact

- Content addition will be restricted to Global L&D at launch; Peer Learning to be explored in future
- Manager capability to assign training courses maybe explored in future; to encourage team to enroll into training while having performance discussions
- Employee experience:
  - ✓ Concept of Enrollment is new – currently only for live events or in-person training; for all course offerings in WD
  - ✓ Encourage behavior of dropping enrollments when seats are limited for in-person; restricted for required courses
  - ✓ Some features that will be turned on but will be left to discovery only – Learning Paths, Comments, Ratings
  - ✓ Some features can only be leveraged over time – learning recommendations will improve as history builds
- Leaders will need guidance on how to view team's learning history as no easy dashboard view in Workday; key as they have been behaviorally conditioned to take ownership of team's development
- Technical considerations can affect user experience – allowing pop-ups, timeout period, and badging integration to import safety training attendance

Communication Approach

Communication Principles - Recap

Alignment

Coordination with XX calendars to account for existing communication calendar events such as Open Enrollment period, Payroll year-end tax documents, Performance EOY reviews and objective setting

Cascading

Previews to HRBPs prior to broader so they are armed with information to answer questions; each group receives targeted comms to create awareness and desire

Strategic Timing

Pre-launch: Build awareness, knowledge and ability to navigate the coming changes
Post-launch: Reinforcement

Multiple Channels

Same message distributed in multiple ways to suit different communication preferences – for e.g., emails for office staff, printed materials for Ops

Detailed Comms Schedule

Communication Timeline – High-level Summary

Who: HR
When: October - November
Goal: Prepping for your role
Messages:
- Follow-up to town-hall on Service Delivery and expansion on their role
- Notifications on training coming up for Recruiters, Shared Services and HRBPs
- Previews of broader communication campaigns

Who: Managers and Associates – Impacted end users
When: All through December
Goal: Continuing to build knowledge and ability to navigate the coming changes
Messages:
- Detailed communications around what process are changing and actions needed
- Continued learning through “Manager Monday Preview” and “Workday Wednesday” campaigns
- Pre-launch preparation and reminders of key dates

September | October | November | December | January | February

“Workday is Live” message

Phase 1. Prepare the Business and Key Teams

Phase 2. Prepare End Users

Phase 3. Support the Transformation

Who: Leadership and HR
When: Mid-September
Goal: Building awareness and setting context
Messages:
- Introduction to Workday Implementation and the “Why”
- Overview of what’s coming
- Your role

Who: Managers and Associates – Impacted end users
When: Beginning mid-November
Goal: Building awareness and knowledge around the coming change
Messages:
- Introduction to Workday Implementation and the “Why”
- “Workday is coming” and introduction to Workday features
- Overview of specific impacts to their processes
- Reminders and reinforcements around key dates
- **Launch of learning campaigns:** “Manager Monday” and “Workday Wednesday”

Who: Managers and Associates
When: January
Goal: Reinforcement and support to make change stick
Messages:
- Direction around specific actions to be taken
- Post go-live “How-Tos”
- FAQs, connection to support

Training Approach

Training Approach Considerations

Workstream Leads' Input

Input needed on feedback from testing sessions and final design decisions

Lessons Learned

Leverage internal and external experiences of past implementations – what worked, what didn't

Ops Inputs

Unique considerations for the field and take logistical challenges into account

Business Inputs

Bandwidth of applicable stakeholders (trainers and trainees) during a busy Q4 is a key driving force

Associates

Assumptions

- No classroom training needed for Associates prior to launch; focus will be on just-in-time support as needed
- Communication will be used as the primary channel for creating awareness

Key Focus Areas for Employee Comms

What is changing?

- Overview of which systems are going away, what data is migrated, historical access, info visibility and task capability in new system
- Key dates for transition, when access to current systems will close, when to start using new system, upcoming system touchpoints

How to use Workday?

- Describe how users can leverage the Workday Chatbot for assistance with tasks in Workday
- Demonstrate how to submit questions using the Workday Assistant

Where to get help?

- Explain how users can access job aids for step-by-step instructions for any task to be completed in Workday or read relevant articles
- Job aids and reference guides to be hosted as Workday articles allowing for easy search without leaving the Workday tool

Who to contact for questions?

- Describe how cases can be submitted via Workday
- HRBPs still a POC for continuity
- Clarity on other channels for troubleshooting so users get comprehensive picture (e.g., pieces that will continue to be supported by vendors/3rd parties)

Managers

Assumptions

- Since Manager Self-service is limited, awareness comms/self-study material will focus on tasks that need approvals and foundational understanding
- Targeted training on tasks where Managers will be involved in the future (for e.g., goal setting, merit planning etc.) can be delivered just-in-time (not in scope for Phase 1 launch)

Foundational Awareness for Leadership

45 min presentation, that can be delivered by HRBPs or distributed for self-study, will include following topics:

- How to view team
- How to view org charts with open positions
- Implications of position management on staffing
- New process for hiring contingent workers in system to track headcount
- How to view team learning assignments and progress
- Succession planning in Workday and upcoming task to state career preference – Timing TBD
- Overview of Reporting Dashboard
- Task approvals and managing your Inbox
- How to setup Workday Mobile to stay connected on the go

HRBPs

Assumptions

- Since HRBPs do not have any transactional responsibility in Workday, the training will instead focus on creating a solid understanding of the new ways of working
- Focus will be on end-user experience so HRBPs can guide Associates and managers accordingly as they continue to remain first POC

HRBP Training Curriculum

Multi-day workshops (2-3 hours / day) will focus on creating base-line understanding of what's changing across all functional areas:

Day 1

- New Technology Landscape & WD Scope
- Workday Basic Navigation
- Employee self-service capability
- Core HCM Foundational concepts – Position Mgmt. & Implications on staffing transactions; Job architecture and what is harmonized, compensation plans
- Core HCM Workday tasks and associated workflows (including HRSS support)
- Manager Task approvals
- Sample E2E scenario walkthroughs

Day 2

- Case Management in Workday – submitting and tracking tickets
- Time Tracking in Workday - tasks for three user sub-groups
- Employee and Manager experience
- Troubleshooting for clock issues, timesheet issues and payroll issues – guiding end users
- Time Off and LOA overview – categories and associated processes
- Viewing payslips, updating payment elections and tax withholdings for Associates

Day 3

- Recruitment basics – process flow
- Position mgmt. implications for requisitions
- Hire and onboarding process
- Internal candidate experience and Manager review of candidate resumes
- Submitting case for creating requisition
- Talent Management in Workday – upcoming activities and annual calendar
- Managing check-ins and entering career preferences

Day 4

- Learning in Workday – courses and integrations
- Employee Experience – viewing course assignments and enrolling
- Manager Experience – viewing team assignments and progress
- Benefits in Workday – harmonization overview and outsourcing with WTW
- Updating benefit elections for qualifying life events

HRSS

Assumptions

- HRIS team members/COEs will receive knowledge transfer from Invisors on completing all back-end administrative tasks.
- Training materials for HRSS designed to train new hires into the team on Workday transactions that they will support Associates, managers and HRBPs with.

Components of HRSS training

General Awareness

- HRBP training courseware can be leveraged to provide general awareness of what's changing for the end users and business

Case Management

- Demonstrate Case Administrator view of the help dashboard
- Describe how cases can be assigned/ monitored/ closed, how comments can be added with nametags for collaboration where needed, escalation mechanism where case must be redirected to COEs, and tracking of SLAs/metrics

Transaction Expertise

- Job Aids for SS on tasks to complete when they receive tickets
- Job aids for end-users on tasks they may request SS assistance for
- Hands-on practice with the assistance of job aids

Recruiters

Assumptions

- Training will focus primarily on understanding of new end-to-end processes and familiarity with Workday system-tasks
- Clarity on new roles and support structure/alignment with business, as a result of reorganization efforts, will be provided in a townhall/ team meeting

Recruiters Training Curriculum

Recruiter training can include hands-on practice if delivered in classroom or demonstrations if being delivered online :

Intro & Requisition Mgmt.

- New Technology Landscape & Workday Integrations
- Basic Navigation - Recruiting hub
- Core HCM Foundational concepts – Position Mgmt. & Implications on Recruitment; Job architecture and what is harmonized, compensation plans
- Recruitment process phases – Requisition Management, Candidate Selection Workflow, Hire and Onboarding
- Posting/unposting job, freezing/unfreezing job requisitions, managing confidential and evergreen requisitions

Candidate Selection Workflow

- Reviewing candidate profiles
- Inviting candidates to apply
- Sharing candidate profiles with Manager
- Overview of steps and stages in candidate selection workflow
- Demonstration of candidate movement through Screen > Assessment > Interview > Reference Check > Offer > Background Check > Ready for Hire

Hire and Onboarding

- Onboarding in Workday and harmonization
- Overview of HRSS tasks to complete hire including managing org assignments
- Onboarding experience for new hires
- Onboarding checklist for Managers

Recommended Job Aids and Workday Articles

Core HCM

Employee Guides

Manager Guides
- Review Candidate Resumes

Recruiter Guides
- Find Candidates
- Initiate Candidate Actions
- Recruiting Home Page
- Submit Case to Create Job Requisition
- Create Job Requisition - Confidential
- Create Job Requisition – Evergreen
- Post Job
- Edit Job Requisition
- Close Job Requisition
- Freeze/Unfreeze Job Requisition
- Screen Candidates and move through selection workflow
- Create Offer
- Hire
- Prospects

SS Guides
- Create Job Requisition

Benefits

Employee Guides
- Update Benefit Elections for life event

Time Tracking and Absence

Employee Guides
- Enter Time
- Request Time Off
- Correct/Cancel Time Off

Manager Guides
- Enter Time/Time Off on behalf of worker
- Review timesheets

Workday Articles

Employee Articles
- Benefits in Workday
- Learning in Workday – what's in the course catalog, enrollments in Workday
- Safety Training Record in Workday
- Time Off and Absence in Workday

Manager Articles
- Stating your Career Preferences in Workday
- Position Management and what it means for your organization's staffing
- Your Team's Learning and Development progress

Change Network

Change Network Member vs. Change Champion

This is where we need your immediate input

Change Network Member
Decision making

- Targeted group of individuals
- Nominated as a spokesperson for a larger group
- Represent key business areas for e.g., Retail, Corporate, Group Brand and International, NA Operations/Mfg.
- Provide feedback and direction to the change approach and deliverables to fit culture and needs of the business

Change Champion
Execution-focused

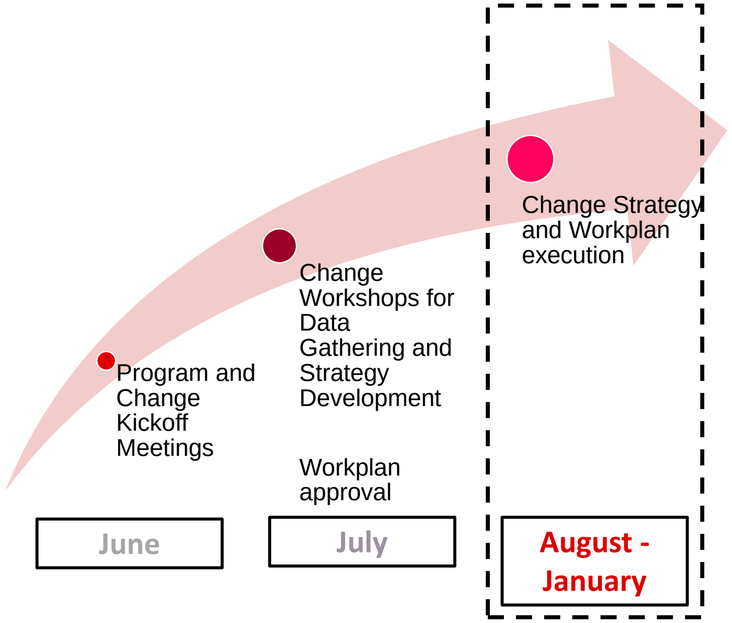
- Lager group of individuals spread across the entire XX landscape
- Nominated or volunteer to help facilitate the change
- Includes HR members and business leaders
- Execution-focused and role-models

Change Network Team Member Characteristics

- **Representative:** Made up of diverse business / location for
- **Influential:** Respected within their country / business and able to influence others
- **Business Partners:** Ability to lead and engage key business leaders, executives and managers
- **Vocal:** Ability to provide input, direction and support when developing change strategy
- **Committed:** Actively participate in the Change Network to represent the opinions/perspectives of others

Time Commitment

- Participate in regular status meetings (approx. one hour/week)
- Review and discuss Change strategy and workplan components – need-based
- Execution phase: Anticipated to grow to approx. two hours/week to help guide delivery of change outputs for their business / location(s)



Next Steps

Next Steps…

- ✓ Identify Change Network Team members
- ✓ Leadership approval of direction for:
  - Communication Approach
  - Training Approach
  - Job Aids

Thank you

Appendix

Shared Services Model - Design Principles

Current Infrastructure/ Communication channel

Workday Case Mgmt. Tool

Seamless & Simple End-user experience

HRBP continues as first POC for Associates and will provide business advisory for leaders / managers

Local HRBP drives cultural change to use self-service and leverage technology

HRBPs can submit a case to provide data elements required for a transaction

Associates will leverage self-service through WD Help & Case Mgmt. Technology if Tier 1 support is needed

Shared Services provides transaction support for Workday

COEs continue to provide functional subject matter expertise while we harmonize

Communication – Plan to Execution

Step 1

Baseline communication plan and principles approved by HRLT and Change Lead

Step 2

Workstream leads to review comms pertaining to their functional area and provide inputs

Step 3

Group/Brand to be added: Decision required – what to standardize vs. what can each make their own?

Step 4

Deep Dive session with Internal comms to align with broader org calendar and tweak as per culture

Step 5

KSI to facilitate working sessions with Comms and workstreams to fine-tune details per need

Step 6

Comms create msg and send to workstream leads for final review: Decision – group-specific comms?

Step 7

Final msgs distributed to Change Network and Translators: Decision – distribution centralized?

Step 8

Distribution per schedule: Decision – distribution for International?
